

Conduct air monitoring at the 9 established monitoring points for 24 hour per day while drilling operations are ongoing. Include monitoring for Volatile Organic Compounds (VOCs), Hydrogen Sulfide ( $\text{H}_2\text{S}$ ), Carbon Monoxide (CO), Explosive Level or Lower Explosive Level (LEL) and Oxygen concentration ( $\text{O}_2$ ). Maintain the log sheet as provided by LDEQ and records of readings. Submit the log sheet to LDEQ on a daily basis. Submit and email summary report to include any significant events.

Elevated readings, strong odors and major discrepancies are reasons to immediately contact the Incident Command for additional instructions.
